At Novo Metal Finishing Equipment we design, machine, build and assemble best-in-class custom plating equipment for the surface treatment industry. With decades of experience in the metal finishing and plating industry, we provide high quality and durable barrel solutions that meet the needs of each specific product and system. The equipment design team supports the entire range of product design options: from exact fit replacement barrels, problem solving changes to existing designs to custom-designed and engineered barrels for new systems.

Plating Barrels & Accessories

Novo Metal Finishing Equipment (MFE) was founded in 2001 as Core Plating Technology and joined local industrial manufacturing company Novo Precision in 2021. We operate a complete manufacturing facility within the Novo Campus in Bristol, Connecticut. Our staff has more than 100 years of combined experience in wet processing and provides solutions to metal processing challenges.

We design and manufacture a wide range of accessories for the metal finishing industry, including: plating barrels, custom barrels, portable plating barrels, hanger arms, tank plating saddles, dangles, gears and rack plating accessories.
